Profile

I'm a passionate web developer and designer with a strong foundation in creating dynamic, user-friendly websites. Currently serving as the lead web developer at Groot Ke, I leverage my expertise in both front-end and back-end technologies to deliver high-quality digital experiences. My journey began with freelancing, where I honed my skills by completing over 50 diverse projects, ranging from small business sites to complex e-commerce platforms. I thrive on problem-solving and love collaborating with teams to bring innovative ideas to life. With a commitment to continuous learning, I'm always exploring new technologies and trends to enhance my craft.

Education

08/2023 – present
Chuka, Kenya

Technology | Computer Science Chuka University

At Chuka University, I immersed myself in a dynamic learning environment that deepened my understanding of computer science principles. The curriculum was challenging yet rewarding, allowing me to explore various areas, including programming, web development, and data structures. Collaborating with peers on projects and participating in coding competitions helped me refine my technical skills and foster a strong sense of teamwork. This experience laid a solid foundation for my career in tech and ignited my passion for continuous learning and innovation.

01/2019 – 12/2022
Kitui, Kenya

High School | KCSE Kisasi School

My high school experience at Kisasi School was like coding a dynamic website—filled with challenges, constant learning, and iterative growth. I navigated a well-structured academic curriculum like a well-organized layout, balancing extracurriculars as interactive elements, while overcoming subjects like math felt like debugging tricky code.

Work Experience

02/2023 – present
NAIROBI, Kenya

Senior Web Developer and Designer GROOT KE

As the lead web developer at Groot Ke, I manage and oversee a variety of web development projects, ensuring they align with client goals and industry best practices. I lead a talented team, fostering collaboration and creativity to develop innovative solutions that enhance user experience. My role involves not only coding and technical implementation but also project management, where I ensure timely delivery while maintaining high-quality standards. This position has allowed me to strengthen my leadership skills, mentor junior developers, and stay updated with the latest technologies, continuously driving the success of our projects.
